TOXICOLOGY

CONTENTS

Volume 48 (1988)

Review Paper

Ozone, nitrogen dioxide and lung cancer: A review of some recent issues and problems
by H.P. Witschi (Oak Ridge, TN) 1–20

Minireview

Ferritin: An expanded role in metabolic regulation
by J.G. Joshi and A. Zimmerman (Knoxville, TN) 21–29

Research Papers

In vivo metabolism of nasally instilled benzo[*a*]pyrene in dogs and monkeys (**Different regions in the nasal mucosa produce similar metabolite patterns**)
by J. Petridou-Fischer, S.L. Whaley and A.R. Dahl (Albuquerque, NM) 31–40

Examination of minoxidil-induced acute cardiotoxicity in miniature swine (**Lesions found are left papillary muscle necrosis, myocardial hemorrhage and inflammation and vascular lesions in the atrial epicardium**)
by E.H. Herman, V.J. Ferrans, R.S.K. Young and T. Balazs (Washington, DC and Bethesda, MD) 41–51

In vitro activation assays with hepatic S9 preparation from wild and laboratory reared woodchucks in the *Salmonella* mutagenicity test (**Natural inducers in wild woodchuck diet may be responsible for higher activity of S9 with DMBA as substrate**)
by K.A. Rashid, J.G. Babish and R.O. Mumma (University Park, PA and Ithaca, NY) 53–59

Effect of long-term feeding of aluminium chloride on hexokinase and glucose-6-phosphate dehydrogenase in the brain (**A dialyzable inhibitor for hexokinase in the brain is increased by feeding aluminium**)
by S. Cho and J.G. Joshi (Knoxville, TN) 61–69

Effect of butylated hydroxyanisole added in vitro or administered to rats on *N*,*N*-dibutylnitrosamine and *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine metabolism by post-mitochondrial supernatant of liver homogenates (**The metabolism of both nitrosamines is affected by BHA only in very high concentrations**)
by R. Pastorelli, A. Ancidei, E. Benfenati, R. Fanelli and L. Airoldi (Milan, Italy) 71–80

Biochemical changes in the rat after chronic thioacetamide intoxication (**Various hepatic changes after thioacetamide are described**)
by V. Nikolaev, M. Kerimova, E. Naydenova, E. Ivanov and D. Adjarov (Sofia, Bulgaria) 81–85

Acrylonitrile depletes glutathione without changing calcium sequestration in hepatic microsomes and mitochondria (**Acrylonitrile seems to deplete GSH without increasing GSSG**)
by C. Haškovec, I. Gut, D. Volkmerová and K. Sigler (Šrobárova, Czechoslovakia) .. 87–92

Glutathione is involved in the early cadmium cytotoxic response in human lung carcinoma cells (**Buthionine sulfoximine eliminates the in vitro threshold for Cd toxicity**)
by Y.-J. Kang and M.D. Enger (Ames, IA) 93–101

Short Communication

Anti-convulsant effects by reduced glutathione and related aminoacids in rats treated with isoniazid **(Cysteine and glycine reduce epileptic seizures caused by isoniazid)**
by A. Pinelli, S. Trivulzio, G. Colombo-Zefinetti and O. Tofanetti (Milan, Italy) 103–107

Book Reviews 109–116

Announcement 117

Toxicity and distribution of 2-methyl-4-chlorophenoxyacetic acid (MCPA) in developing chick embryos **(Distribution and effects of a commercial herbicide mixture in chick embryos illustrate the possible usefulness of this model)**
by E. Arias, R. Maci and A. Santagostino (Milan, Italy) 119–125

Differences in immunological susceptibility of cadmium toxicity between two rat strains as demonstrated with cell biological methods. Effect of cadmium on DNA synthesis of thymus lymphocytes **(Different amounts and properties of thymocytes may be responsible for differences in cadmium toxicity)**
by A.F.W. Morselt, W. Leene, C. De Groot, J.B.A. Kipp, M. Evers, A.M. Roelofsen and K.S. Bosch (Amsterdam, The Netherlands) 127–139

The absorption of trichloroethylene and its metabolites from the urinary bladder of anesthetized dogs **(Trichloroethylene may be metabolized in the urinary bladder)**
by T. Hobara, H. Kobayashi, T. Kawamoto, S. Iwamoto and T. Sakai (Ube, Japan) 141–153

Immunosuppressive properties of deoxynivalenol **(The trichothecene mycotoxin causes various immune suppressive effects and leads to atrophy of the thymus)**
by S. Robbana-Barnat, C. Lafarge-Frayssinet, H. Cohen, G.A. Neish and C. Frayssinet (Villejuif, France and Ontario, Canada) 155–166

Growth in young rats after termination of sodium selenite exposure: studies of growth hormone and somatomedin C **(Selenium influences the secretion of pituitary hormones and thereby influences growth)**
by O. Thorlacius-Ussing, A. Flyvbjerg and H. Ørskov (Aarhus, Denmark) 167–176

Ultrastructural abnormalities in the germinal epithelium of adult quail testes following insecticide chlordecone exposure **(Above 40 ppm in the diet, chlordecone produces germinal epithelium atrophy, and inhibition of spermatogenesis)**
by R.D. McCall and V.P. Eroschenko (Moscow, ID) 177–189

Morphological recovery of hippocampal pyramidal neurons in the adult rat exposed in utero to ethanol **(Prenatal exposure to alcohol reversibly reduces the number of dendritic spines of hippocampal pyramidal neurons)**
by I. Ferrer, F. Galofré, D. López-Tejero and M. Llobera (Barcelona, Spain) 191–197

Response of blood and brain cholinesterase to dermal exposure of bromophos in the rat **(Dermal application of an organophosphate leads to cholinesterase inhibition)**
by T. Shivanadappa, P. Joseph and M.K. Krishnakumari (Mysore, India) 199–208

Chronic toxicity of 3,4,3′,4′-tetrachlorobiphenyl in the marmoset monkey (*Callithrix jacchus*) **(The toxic effects of TCB are described and the marmoset considered as a suitable model for human toxicity)**
by K.J. van den Berg, C. Zurcher, A. Brouwer and D.W. van Bekkum (Rijswijk, The Netherlands) 209–224

Oral cadmium chloride intoxication in mice: effects of dose on tissue damage, intestinal absorption and relative organ distribution **(Effects and distribution after oral application are described)**
by O. Andersen, J.B. Nielsen and P. Svendsen (Odense, Denmark) 225–236

Prevention of diisopropylphosphorofluoridate (DFP)-induced skeletal muscle fiber lesions in rat **(d-tubocurarine, atropine sulfate and atropine methylnitrate alone reduce signs of muscle toxicity and a combination of dTC and atropine methylnitrate affords complete protection)**
by G.T. Patterson, R.C. Gupta, K.E. Misulis and W.-D. Dettbarn (Nashville, TN) ... 237–244

Depletion of liver regulatory heme in benzene exposed rats **(Benzene interferes in various ways with the delicately balanced heme synthesis)**
by S.M. Siddiqui, G.S. Rao and K.P. Pandya (Lucknow, India) 245–251

Transplacental passage of titanium after treatment with titanocene dichloride (**Titanocene dichloride does not cross the placental barrier in mice**)
by P. Köpf-Maier, U. Brauchle and A. Heussler (Berlin, F.R.G.) 253–260
Cadmium toxicity on mouse pre-implantation zygotes in vitro: interactions of cadmium with manganese, zinc and calcium ions (**Cadmium toxicity is decreased by divalent metal ions**)
by H.-S. Yu and S.T.H. Chan (Hong Kong) 261–272
Differential effects of D- and L-isomers of triiodothyronine on pituitary TSH secretion and peripheral deiodinase activity in the rat (**A remarkable difference between enantiomers of T_3 in suppressing pituitary TSH output is observed but not in activation of hepatic deiodinase**)
by C.A. Jones, C.G. Brown, T.A. Dickens and C.K. Atterwill (Welwyn, U.K.)..... 273–284
On the time-dependence of amphiphile-induced haemolysis (**Time course of membrane damage differentiates between various modes of action of surfactants**)
by B. Isomaa, A.C. Engblom and H. Hägerstand (Turku, Finland) 285–291
Evidence for an enterohepatic circulation of ochratoxin A in mice (**Ochratoxin A seems to undergo a complicated absorption-reabsorption process which is influenced by phenylalanine**)
by A. Roth, K. Chakor, E.E. Creppy, A. Kane, R. Roschenthaler and G. Dirheimer (Strasbourg, France and Münster, F.R.G.) 293–308
Contents of journals relating to Toxicology 309–314
